

Product Outline

- Use Black Seed as a controlled variable
- Give people who are participating in the study an exact amount of black seed oil to take and how many times a day.
- Get at least 10 people to be part of the study and at least 5 of the 10 who won't take the Black Seed
- Observe how black seed affects an individual with a particular trait versus one who doesn't take Black Seed.
- Record results of study
